Graduated

Martin St, Caridad, Cavite City, Cavite

2012 – 2016

### **Ladislao Diwa Elementary School**

Graduated as 1<sup>st</sup> Honorable Mention

20 P. Burgos Ave, Santa Cruz, Cavite City, Cavite

2006 – 2012

## **PROJECTS**

---

### **Bautista Hospital QR Code-Based Contact Tracing System**

- A thesis project where I took on the role of a back-end developer, utilizing PHP as the primary programming language using CodeIgniter 4 Framework. This project enabled the hospital to proactively track and monitor visitors and staff entering the premises and issue notifications in the event of potential contact with an infected or suspected COVID-19 individual. The project also served as the primary building block for my programming skills, significantly contributing to my skillset's growth and enhancement.

### **Web-Based Sales and Inventory System of Raj Pet shop**

- Worked as both a front-end and back-end developer. This dynamic role allowed me to create a well-rounded and functional system that not only looked appealing but also functioned efficiently to meet the needs of the pet shop's sales and inventory management. Furthermore, it helped me to refine my programming skills with regards to web development.
